

# UNWANTED!

## CANADA THISTLE!

### Rap Sheet

#### Type: Perennial

- ☑ This perennial shoots out massive root systems and rhizomes so intense that tillage actually will spread the plant!

#### Leaf: Broadleaf

- ☑ Has an oblong leaf alternating on the stem
- ☑ Prickly spines on the tips of the leaves

#### Head/Flower

- ☑ Global heads that are usually branched inflorescence
- ☑ Has a purple, sometimes white flower

#### Control:

Canada Thistle is one of the toughest weeds to kill due to the root system; a strong mix of broadleaf herbicides with multiple modes of action will be the best solution. Please contact Charlie Kail or Fred Kungl for more information!!
